# OBSERVATIONS

ON THE

## AGRICULTURAL STATISTICS OF IRELAND,

FOR THE YEAR 1873.

TO HIS GRACE JAMES, DUKE OF ABERCORN, K.G.,

&c.,

&c.,

&c.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR GRACE,

On the 7th of August, 1873, I had the honour of submitting a return of the acreage under flax in 1872 and 1873,—also the number of scutching mills in 1872; on the 11th of the same month a return giving the number and value of live stock in Ireland from 1861 to 1873, inclusive; and on the 24th of September, General Abstracts showing, by counties and provinces, the extent under the various crops, and the number of live stock in 1872 and 1873, together with an appendix containing extracts from the works of the celebrated Sir John Sinclair, Professor Buckman, and other eminent writers, as to the great importance of extirpating weeds. In March, 1874, I submitted for your Grace's consideration, tables giving the estimated average produce of the principal crops of 1873, compared with 1872; the emigration from Ireland during 1873; and the number and locality of mills for scutching flax.

I now beg to forward detailed tables giving the holdings, classified according to their extent, which show by counties, baronies, and poor law unions, the acreage under crops, and the number and description of live stock in 1873.

The number of scutching mills, the position of each mill, and the number of weeks it was at work from 1st June, 1872, to 31st May, 1873, are given at page 203.

### PART I.—TILLAGE.

The acreage under tillage, grass, fallow, woods and plantations (according to the returns), and bog and waste in 1873, was as follows:—

Under Crops, including Meadow and Clover, . . . . .	5,270,746 Acres.	Division of land.
„ Grass, or Pasture, . . . . .	10,413,991 „	
„ Fallow, . . . . .	13,455 „	
„ Woods and Plantations, . . . . .	323,656 „	
„ Bog, Waste, &c.,* . . . . .	4,305,348 „	
Total, . . . . .	20,327,196	

The area under crops in 1873, compared with 1872, (including cereals, green crops, flax, rape, and meadow and clover,) showed a decrease of 216,567 acres; grass (exclusive of meadow and clover) increased by 167,876 acres; fallow decreased by 4,949 acres; woods and plantations by 2,047 acres, and bog and waste increased by 84,946 acres.

The area and proportionate extent of each crop in 1872 and 1873, with the increase or decrease in the acreage in the latter year, are given in Table I.

The variations in the crops of 1873, compared with 1872, were a decrease in cereals, green crops, vetches, and rape, of 278,931 acres. Of cereals, wheat shows a decrease of 57,740 acres; oats 113,739 acres; bere and rye of 751 acres. In green crops, potatoes decreased by 88,609 acres; cabbage 11,337 acres; vetches and rape 6,755 acres. The crops which show an increase are barley 11,102 acres; beans and pease 1,052 acres; turnips, 1,137 acres, mangel wurzel and beet root 3,399 acres; carrots, parsnips, and other green crops 394 acres; flax 7,305 acres, and meadow and clover 37,975 acres.

Of the total extent under tillage, 80.6 per cent., or about four-fifths, were under three crops—viz., oats, potatoes, and hay.

\* Under this head the area of barren mountains, roads, towns, and townland water is included. The areas of the larger rivers, lakes, and tideways (494,726 acres) are excluded.

TABLE I.—The acreage under the principal crops in 1872 and 1873, and the increase or decrease in the latter year:—

Number of Occupiers. As in many instances landholders occupy more than one farm, it has been considered desirable to ascertain the *number of persons* having more than one holding; a Form was therefore prepared, in which the Enumerator was required to enter the name of every landholder who had two or more farms, together with the area of each holding, and the locality in which it was situated.\* The numbers are given in Table VI. by counties and provinces. On comparing the results in this table with the figures in the preceding one (page ix.), it appears that in 1873 there were 590,172 holdings in the hands of 539,545 occupiers.

The number of separate holdings and the number of occupiers in each Province were as under in 1873 :—

The following are extracts from my Report on the *estimated* average produce of the crops grown in 1873.

"The acreage under crops in 1873 as compared with 1872, shows a decrease in cereal crops—in wheat of 57,740 acres, oats 113,739 acres, bere and rye 751 acres. Barley increased by 11,102 acres. Potatoes decreased by 88,609 acres—(and yet afforded an increase in yield of 877,233 tons),—and cabbage by 11,337 acres. Turnips show an increase of 1,137 acres, mangel wurzel 3,455 acres, flax 7,305 acres, and hay of 37,975 acres.

Increase or Decrease in the acreage under Crops.

"The crops which show an increased *estimated average produce* per acre in 1873 compared with 1872 are—wheat 0·3 cwt., oats 1·4 cwt., barley 1·6 cwt., bere 0·2 cwt., rye 0·7 cwt., potatoes 1·2 ton, turnips 1·3 ton, mangel wurzel 1·1 ton, and flax 2·2 stones. Hay shows a decrease of 1·0 ton.

Increase or Decrease in the *estimated rate of produce* per statute acre.

"In the *estimated total produce of cereal crops* there is an increase of 263,845 quarters; in oats the increase is 258,309 quarters, in barley 146,794 quarters, and in rye 525 quarters. There is a decrease in wheat of 140,268 quarters, and in bere 1,515 quarters. In *green crops*—potatoes increased by 877,233 tons, turnips by 466,662 tons, mangel wurzel by 84,908 tons, and flax by 2,754 tons. Cabbage decreased by 110,011 tons, and hay by 189,833 tons.

Increase or Decrease in the *estimated total produce of the Crops*.

"The *acreage* under the principal crops in 1872 and 1873, and the increase or decrease in the latter year, are given in Table X.; the *estimated average produce* per acre and the *total yield* in Tables XI. and XII.; a comparison of the *average produce* of the crops

"There can be no doubt that if due care was bestowed on the cultivation of the lands of Ireland, the outlay would be amply repaid by a largely increased yield; but, unfortunately, crops of weeds, which are to be seen in almost every part of the country, not only rob the farmer himself, but often inflict a vast amount of injury on his neighbour. It has been estimated that the money loss to Ireland from the above cause exceeds a million and a half.

### "METEOROLOGICAL OBSERVATIONS.

Meteorological observations.

"In connexion with the Agricultural Statistics, I beg to give the following abstract (Table XV.) of the Meteorological Observations registered at the Ordnance Survey Office, in the Phoenix Park, during the year 1873, for which I am indebted to the courtesy of Colonel Wilkinson, R.E.

"The barometer stood highest in 1873 on the 21st of February, at 9.30 A.M.—wind calm—when it was 30.744 inches; it was lowest at 3.30 P.M. on the 20th of January—wind calm—when it was 28.470 inches. The highest temperature of the air during the year was 81.6 degrees of Fahrenheit, on July 20th, and the lowest 23.0 degrees, on February 2nd, November 2nd, and December 11th. The greatest quantity of rain which fell in a day (24 hours) was 1.350 inches, on the 13th of September—the wind being W. The point from which the wind chiefly prevailed was the W.; it blew from that direction 89 days, with an average pressure of 2.47 lbs. per square foot. The strongest wind was from the S.W., on the 21st of December, when the pressure was 25 lbs. per square foot.

In conclusion, I have, as in former years, to express my respectful acknowledgments to the magistracy, gentry, and clergy of all denominations for their continued assistance with reference to these statistics. To the metropolitan and provincial press I am also greatly indebted for their valuable aid in making known the importance of affording accurate information to the enumerators—who were selected from the Royal Irish Constabulary and the Metropolitan Police, and who, I need scarcely observe, discharged the duty of collecting the various returns with their usual efficiency.

I have the honour to be

Your Grace's very obedient servant,

WILLIAM DONNELLY,

Beans and Pease were included in the same column in the Returns up to the year 1851. The produce of Flax in 1847 was estimated at 48 stones per statute acre. There was not any return of produce for Cabbage in 1847, as the extent of land under that crop was entered under the head of "Other Green Crops" in the Enumerator's returns.

NUMBER OF MILLS FOR SCUTCHING FLAX IN EACH COUNTY AND PROVINCE.

TO HIS GRACE JAMES, DUKE OF ABERCORN, K.G.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND,

&c. &c. &c.

MAY IT PLEASE YOUR GRACE,

I had the honour of submitting, on the 31st July, 1874, a Return of the acreage under Flax in 1873 and 1874, and on the 14th of August following, General Abstracts, showing the extent under the various crops, and the number of live stock in 1873 and 1874, by Counties and Provinces; the Abstracts also contained an Appendix in which were given extracts from the works of the late Sir John Sinclair, Professor Buckman, and other eminent writers, as to the great importance of *extirpating weeds*. I beg now to bring under your Grace's consideration, Tables which give the *estimated average produce* of the principal crops, and the total emigration from Ireland in 1874.

The Tables relating to the *average produce* of the crops per acre, have been carefully compiled, as in former years, from information obtained by members of the Royal Irish Constabulary and of the Metropolitan Police, from practical farmers, and other persons qualified to form an opinion as to the yield in that *electoral division*, with the cultivation and soil of which they were acquainted. The names and residences of the parties affording information are stated by the Enumerators on the forms supplied to them.

Mode of collecting the Returns of Produce.

Copies of these Returns were forwarded to the Chairman and Board of Guardians of each Union, for revision, and I have the satisfaction of stating, that out of 3,438—the entire number of electoral divisions in Ireland—Returns revised or approved by the Guardians\* have been received for 2,675 electoral divisions.

The acreage under crops published in the "General Abstracts" has been carefully revised also the figures used in the calculations, so that the following Tables are as approximately accurate as can be expected in returns of this description.

The acreage under crops in 1874, as compared with 1873, shows, in cereal crops, a decrease under oats of 30,075 acres, and in barley of 18,507 acres; and an increase under wheat of 20,424, and of bere and rye of 677 acres. In green crops potatoes decreased by 10,837 acres, but a greater yield afforded a large increase in the total produce of that crop for 1874; turnips decreased by 14,260 acres. In other crops flax decreased by 22,390 acres, mangel wurzel increased by 37 acres, cabbage by 5,069 acres, and hay by 68,431 acres.

The crops which show an increased *estimated average produce* per acre in 1874, compared with 1873, are—wheat 3·7 cwt., oats 0·7 cwt., barley 3·3 cwt., bere 2·8 cwt., rye 0·9 cwt., potatoes 1·0 ton, turnips 0·5 ton, mangel wurzel 0·6 ton, cabbage 1·0 ton, and flax 2·4 stones.

In the *estimated total produce* of *cereal* crops there is an increase of 580,729 quarters; in wheat the increase is 218,062 quarters, in oats 246,269 quarters, in barley 111,861 quarters, in bere 1,005 quarters, and in rye 3,532 quarters. In *green* crops—potatoes increased by 868,545 tons, mangel wurzel by 24,672 tons, cabbage by 81,221 tons, and hay by 155,125 tons. Turnips decreased by 22,275 tons, and flax by 1,806 tons.

The *acreage* under the principal crops in 1873 and 1874, and the increase or decrease in the latter year, are given in Table I.; the *estimated average produce* per acre and the *total yield* in Tables II. and III.; a comparison of the *average produce* of the crops per acre in each county and province in 1873 and 1874, in Table IV.; and in Table V.

1874.

is given the total extent under the principal crops, the total produce, and the *estimated* average yield per acre, for each year from 1851 to 1874, inclusive.

There can be no doubt that if due attention were bestowed on the destruction of weeds the lands of Ireland would afford a largely increased yield; but, unfortunately, *luxuriant crops of weeds*, which are to be seen in almost every part of the country during Summer and Autumn, not only rob the farmer himself, but often inflict a vast amount of injury on his neighbour. It has been *estimated* that the money loss to this country from the above cause *exceeds a million and a half sterling*.

METEOROLOGICAL OBSERVATIONS.

Meteorological Observations.

In connexion with the Agricultural Statistics, I beg to give the following abstract (Table VI.) of the Meteorological Observations registered at the Ordnance Survey Office, in the Phoenix Park, during the year 1874, for which I am indebted to the courtesy of Colonel Wilkinson, R.E.

The barometer stood highest in 1874 on the 6th of March, at 9.30 p.m.—wind calm—when it was 30.821 inches; it was lowest at 3.30 p.m. on the 11th of December—wind W.—when it was 28.595 inches. The highest temperature of the air during the year was 81.3 degrees of Fahrenheit, on July 18th, and the lowest 22.5 degrees, on February 5th. The greatest quantity of rain which fell in a day (24 hours) was 1.710 inches, on the 13th August—the wind being calm. The point from which the wind prevailed was the W.; it blew from that direction 119 days, with an average pressure of 2.26 lbs. per square foot. The strongest wind was from the S.W., on 27th March and 2nd April, when the pressure was 25 lbs. per square foot.

Emigration from Irish Ports.

The ages of the emigrants are given by provinces, in Table IX., from which it appears that in 1874—69·1 in every 100 of the persons who left Ireland were between the ages of 15 and 35 years. In 1873 the proportion per cent. for these ages was 76·7 per cent.

On the important subject of Emigration from Ireland, and its causes, I venture to quote the following words as reported to have been spoken by your Grace at the Lord Mayor's Banquet, on the 3rd of February last—

\* \* \* \* \*

"I believe that at the present moment the average wages of the agricultural labourer in most parts of Ireland are fully 10s. a week, and I know of some places where they are more; and though, notwithstanding this increase of wages, which, comparing the prices of the two countries, are fully equal to 12s. in England, we have still a large drain of emigration to lament; yet it is satisfactory to know that during the past year the number of persons emigrating has decreased by, I believe, something like 17,000 persons. But, my lord, *I am strongly of opinion that the unsuitable dwelling of the agricultural labourer in this country is a stronger reason for his desiring to seek his fortune in a foreign country than any deficiency of wages; and I trust that simultaneously with the increase of wages a more suitable style of dwelling—one more in accordance with the rising wealth of the country—may be in store for the agricultural labourer of the future.*"

These words cannot fail to attract general attention to the present condition of too many of the dwellings of the agricultural labourers in Ireland.

### SCUTCHING MILLS IN IRELAND.

Scutching  
Mills.

A Table is given, commencing at page 25, showing by Provinces, Counties, Baronies, Parishes and Townlands, the locality of every Mill for scutching Flax; the number of Stocks and Handles in each; and the period, in weeks, during which every Mill was at work, from the 1st of June, 1873, to the 31st of May, 1874. There were 1,380 of these Mills at the time the Statistics were collected, (in June, 1874,) of which 1,295 were in Ulster,—25 in Leinster,—31 in Munster,—and 29 in Connaught.

The following is the number of these Mills, in each year, from 1865 to 1874, inclusive, by Provinces:—

I beg to repeat my respectful acknowledgments for the continued assistance, which, for so many years has been afforded to the Enumerators by the landed proprietors, the clergy of all denominations, and the tenant-farmers of Ireland in connexion with these Statistics. I have also to express my best thanks to the several Boards of Guardians by whom the *average acreable yield* of the crops has been revised; and to the Metropolitan and Provincial press for making widely known the importance of these Statistics. It affords me much gratification to state to your Grace that those members of the Royal Irish Constabulary and Metropolitan Police who acted as Superintendents of the work, and also the Enumerators, discharged this duty with their usual efficiency.

I have the honour to be,

Your Grace's

Very faithful servant,

COPIES of the CIRCULARS and FORMS used in obtaining the average yield of the CROPS per acre, for 1874.

General Register Office,

Charlemont House, Dublin,

19th October, 1874.

AGRICULTURAL STATISTICS—IRELAND, 1874.—FORM C.

County of \_\_\_\_\_ Union of \_\_\_\_\_

Constabulary District of \_\_\_\_\_

Electoral Division of \_\_\_\_\_

RETURN showing the Estimated Average Produce per English and Irish Acre, of the following Crops in the Electoral Division of \_\_\_\_\_.

SIR,

You will receive herewith blank copies of "Form C," referred to in the "General Instructions" addressed to the Enumerators on the 13th of May, in order to enable you to procure Returns of the Rates of Produce of the various Crops grown in each Electoral Division of your District. The Returns should be sent to this Office—in one file—when completed.

I beg you will be so good as to select for this service Enumerators known to you for their intelligence and acquaintance with the parties resident in the Electoral Divisions for which the Returns are required. Instructions as to the method of filling the Forms are printed on them. Pray direct the Enumerators to pay particular attention to these instructions.

From the friendly co-operation and assistance afforded to the Enumerators by all ranks and classes when collecting the Agricultural Returns for this year, I confidently trust that by making inquiries from the resident Gentry, Clergy, and intelligent Farmers in the District, a valuable approximation will be arrived at as to the average Rates of Produce per Acre of the various kinds of Grain, Potatoes, and other Crops grown in the several Electoral Divisions;—that being the object of this Return,—to which accuracy, as far as possible, can alone give any real value.

Your attention is particularly requested to this subject, in consequence of the increasing importance of Agricultural Statistics, and I trust you will be enabled to forward the Returns for your District to this Office on or before the 7th of November, in order that a General Abstract of the results may be compiled and submitted for the consideration of His Grace the Lord Lieutenant.

It is my intention, as in former years, to solicit the assistance of the Boards of Guardians on this difficult question, in order that I may have the advantage of their opinions as to the average Rates of Produce in the several Electoral Divisions. This information will form a valuable auxiliary to that obtained through the Constabulary.

I am, Sir,

Your faithful servant,

WILLIAM DONNELLY,

Registrar-General.

I believe the foregoing Return to be correct.

\_\_\_\_\_ Sub-Inspector.

#### INSTRUCTIONS.

1. In filling in the Rate of Produce, the yield will be stated per Irish and also per English or Statute Acre, for each Crop, and the Enumerator will be careful to enter the Rate in the Weights (Act 25 and 26 Vic., cap. 76,) mentioned opposite to the respective Crops named on the other side of this Form. It is particularly to be borne in mind that the average yield per Acre is for the entire Electoral Division—not for any individual Farm or portion of the Electoral Division.

2. One Form will be filled by the Enumerator for each Electoral Division which is altogether within the Constabulary District; for such Electoral Divisions as are in two or more Constabulary Districts, the Sub-Inspectors will arrange on which District the duty will devolve of obtaining the information, as it is very desirable that only one Form C be forwarded for each Electoral Division.

3. The information as to the probable yield of the Electoral Division for which the Return is made, should be obtained from intelligent Landholders of the District, whose Names and Addresses will be stated in the column left for that purpose.

4. The greatest care should be taken in filling these Forms, and the information should be obtained and the Return sent to the Sub-Inspector of the District, on the 7th of November—sooner if practicable.

5. In those parts of the country in which the Cunningham Measure is used, the word "Irish" may be erased with the pen, and the word "Cunningham" substituted at the head of the column. The Enumerator is requested to reduce Irish, or Cunningham measure, by the Form supplied for that purpose, viz., FORM H, which gives to the nearest quarter the equivalent English or Statute Measure; and no fraction less than one-quarter should be used in either the English or Irish column.

GENTLEMEN,

RATES OF PRODUCE.

I beg to enclose copies of Returns showing the *estimated average produce*, by the *English* and also by the *Irish Acre*, of the various crops grown in 1874 within each Electoral Division of your Union, in order to obtain from the Guardians their opinion as to whether the *AVERAGE PRODUCE per Acre*,—obtained by the Enumerators from resident Landholders,—fairly represents the yield of the respective crops.

In case the Guardian signing the Return considers any rate entered upon it to be *above* or *below* what it should be, columns are provided in which to insert the *corrected rate*.

As these Forms may be filled without imposing much trouble, I shall feel obliged if the Guardians will be so good as to favour me with their opinion respecting the produce of the various crops grown this year in their Union, and thus aid in increasing the value of these Returns, which are of so much general importance to the community.

May I request you will be so good as to give directions to the Clerk of your Board to *return these Forms to me as soon as possible*, as they are required to assist in compiling for publication the Table of *estimated average produce* of the Crops in 1874.

In case it is found inconvenient to obtain the signature of an Ex-Officio or Elected Guardian particularly connected with any Electoral Division, the signature of any other Guardian acquainted with the District will be sufficient;—or, if these *average rates of produce* are discussed and decided upon at a Meeting of the Board, the signature of the Chairman, or of the Clerk, if authorized, will answer the purpose.

I take this opportunity of expressing my obligations to the many Guardians who have been so kind as to assist me in the revision of the Returns of the *average produce* in former years, and I trust that, on public grounds, I may be excused for soliciting the opinion of your Board on this subject.

Communications to this Office *NEED NOT* be prepaid.

I am, Gentlemen, your faithful servant,

WILLIAM DONNELLY, Registrar-General.

To the Chairman and Board of Guardians.

\* The Registration Counties consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located, hence all the Registration Counties differ more or less from the Counties proper.

† Owing to the defective state of the Registration, the figures for Births, Marriages, and Deaths are only an approximation to the real numbers.

‡ The estimated total population of each sex in Ireland, exclusive of the Army, Navy, and Merchant Seamen abroad, at the middle of each of the years 1871, 1872, and 1873, was as follows:—
